

TOWARDS THE SUN

APARTMENT INTERIOR

MONTH OF DESIGN 2017
INTERIOR OF THE YEAR

The vantage point for the attic concept is based on the illumination of space and on outward-oriented vistas. The central part of the apartment features a "canyon" within the construction structure bringing in the natural light and directs the views towards the south. The "canyon" expands rhythmically from the north towards the south side featuring a covered terrace offering a panoramic city view.
