

FLUENT DESIGN
OFFICE SPACE

The basis for designing Microsoft's business premises is the Windows Fluent design. It represents the identity of the Windows environment. But how can we implement the Fluent Design concept in Microsoft's premises? The walls that limit the space extend over the boundaries of the room and thus become 2D elements (Windows) space. We will also add two 3D elements to the common area, with one element being the reception desk and the other a kitchen. Both 2D wall elements and 3D functional elements represent the Windows Fluent Design environment. In this way, the Windows environment is transformed into Microsoft's business premises.

Code name:	Fluent design
Program	Office design
Type:	Commission
Year:	2019
Client:	Microsoft
Location:	Ljubljana, Slovenia
Area:	450m ²
Architects:	Superform; Marjan Pobljšaj, Anton Žižek, Špela Gliha, Jure Uranič
