AND..OR

FAMILY HOUSE

Based on the basics we wished to keep the principle placement of the farm on the terrain. The new concept uses the inclination of the terrain and creates the facilities that are burrowed on one side, and laid on the other. The mathematical symbols “and”, “or” represent a tool, which lay the house on the terrain. They also create a cross section that determines the laid and the burrowed space. The shift in the stories creates a jutted roof on one side and keeps the light in on the other.
The mathematical symbols has the function to link the pattern of the before separated facilities of the farm, which also creates new spatial and lighting effects.

Code name:	**And, or**
Program:	Family house
Type:	Commission
Year:	2010
Client:	Private
Location:	Celje, Slovenia
Area:	305 m2
Architects:	Superform; Marjan Poboljšaj, Anton Žižek, Meta Žebre
Landscape design:	Matej Kučina (Bruto)
