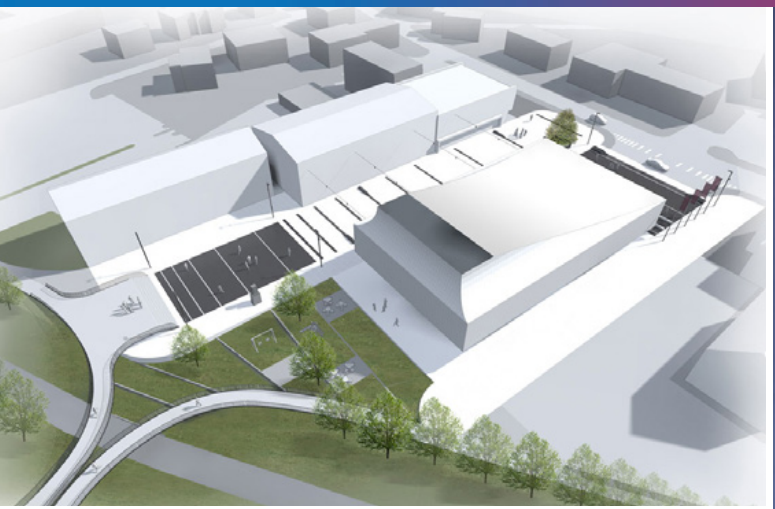
HEART

TOWN SQUARE DESIGN



The main market of every town is its central area and the institution of the central town activity program. The proposed cultural centre of the composers Ipavec would assume the role of a “town hall” and became the town’s centre and symbol.
Like the gene carrier of hereditary information in the form of DNA, the squares and green areas are the genome of the town of Šentjur. The open spaces become the identity of the town of Šentjur, which carries a unique genetic code and as a result a town hall elevates in the central square. It becomes the symbol of the town of Šentjur and a cultural epicentre of Slovenia.

Code name:	**Heart**
Program:	Town square design
Type:	Commision
Year:	2014
Client:	County of Šentjur
Location:	Šentjur, Slovenia
Area:	XL
Architects:	Superform; Marjan Poboljšaj, Anton Žižek, Špela Gliha, Jernej Markič
