

1000 PETAL LOTUS
DHIMAHI OFFICE

The basic elements of design are Dhimahi digital world, Dhimahi mandala and Dhimahi urban city. A whole space is one big mandala reminiscent of a lotus flower. Concentric circles run around the central place. These concentric circles separate a public place from the working place which is situated by the windows. Business premises become a city with recognizable urban elements such as: promenade, plaza, amphitheater, observatory, greenhouse, urban nest. Dhimahi business premises offer a cozy atmosphere, which is enriched by mandala-shaped ceiling, the golden color of the central place and the patterned glass walls, as well as the unique round shape furniture.
