

# FLUENT DESIGN 2

## MICROSOFT OFFICE

#### IDENTITY DESIGN

This is our second design intervention for the Microsoft premises. We have implemented a new facelift for the existing premises on the opposite side of the office building. The design concept mirrors our first intervention, utilizing the same materials and colors to create a cohesive and unified appearance across both sides of the Microsoft premises.

The aim is to create a functional space that reinforces the brand and represents the company as modern, engaging, thoughtful, and cool. Our goal is to integrate the company's identity into the design, making the space more than just a trendy decoration. It should be a bold, provocative, iconic, and inspiring venue.
