

WEAVING PATTERN EXPERIENCE PARK

BASIS

The Experience Park is located in the picturesque Poljanska valley and is designed for playful learning through nature.

CONCEPT

Its concept is based on a sensory encounter with three natural elements: Water, Air, and Light. These guide a unique story connecting local traditions (art, craft) with creative exploration. The park includes a children's playground that encourages physical play and discovery.

The project consists of two wooden structures—a pavilion and an observation tower—set within a nature park in the Poljanska Valley. Both buildings serve as tools for interpreting natural elements and offer a playful, sensory architectural experience.
